

PICCHIANI & BARLACCHI

Shaping metal since 1902

PICCHIANI & BARLACCHI

Tradition, Made in Italy, Quality imprinted on metal

Over 110 years have passed since the foundation of Picchiani & Barlacchi in 1902: over one century of culture and art are crystalized in our artistic and commemorative medals, crests, trophies, fashion accessories and many other objects, manufactured with mastery. They remind us of unforgettable events at local, national and international level.

Our origins are profoundly eradicated in Florence's cultural and artistic milieu and our medals can prove it: Picchiani & Barlacchi's archive comprehends over 400.000 dies, imprinting on metal our national and international history from early 20th century up until today.

We manufacture prestige objects in a solely independent way, without delegating any phase of production neither employing product of foreign origin, **letting Made in Italy grow stronger and flourish.**

Gazing at the future, as my ancestors did before me and as we are also doing today together with my mother and my aunt, we are carrying on our *"family narrative"* of constant pursue of quality and excellency.

Since over one century, we have been welcoming every order with the same care and enthusiasm, designing it together with the client and personalizing it according to his own tastes and requirements. We do not only shape metal, we care for every detail and carefully create immortal pieces of art, apt at celebrating the importance of a certain event and the client's reputation.

MATTEO PARRI

CEO Picchiani & Barlacchi

WHY CHOOSING A PLATE TODAY?

The plaque has always been the ideal gift that represents the tangible symbol of a **meeting**, of a **milestone achieved** - whether corporate or sports-related - or of a **moment to remember**.

By choosing a Picchiani & Barlacchi plaque, you are entrusting **master artists who have been shaping and casting metal objects into unique and refined works for over 110 years**, cooperating with international master artists as well as Florence engravers, printers and artisans' mastery along with up-to-date techniques.

Thanks to our experience **you have the certainty of giving a precious object that honors those who receive it.**

THE PICCHIANI & BARLACCHI METHOD

Picchiani & Barlacchi's method requires several production phases.

The journey begins with a **product's sketch**, which has been created strictly for the client's own use and is protected by copyright.

From this, the artist will produce a plaster model, and then by casting, will get the prototype. Before starting the production, our artisans will **hand retouch** the model to correct imperfections and refresh the details.

Each phase will be supervised meticulously until the conclusion of the production line. The plaques **will undergo a meticulous quality check and will be selected** in order to be impeccable for shipment or pick up.
